Interactive comment on “Selective preservation of organic matter in marine environments – processes and impact on the fossil record” by K. A. F. Zonneveld et al.

C. Walters
clifford.c.walters@exxonmobil.com

Received and published: 6 July 2009

On pages 6380-6381, the paper states "McKenna et al. (2009) recently identified vanadyl porphyrins in raw crude oil using FTMS".

I wish to call to your attention that my colleagues have prior claim to this observation.
