Received and published: 27 December 2012

Dear Dr. Kanduč,

having now read the reports from both reviewers, I would like to encourage you at this point of the review process not to submit a revised version of your manuscript to BG.

While both reviewers find your findings interesting in principle, notably reviewer 1 does have serious concerns as to your isotopic approach. May I recommend you therefore to rework your manuscript according to their suggestions and to submit it to an alternative journal.

C6899

Best regards,

Tom Battin
