Received and published: 10 October 2016

Taxonomic note

Due to conflicting taxonomy (see NCBI taxonomists report below), the genus name “Pleuronema” will be replaced by the name “Pleurinema” throughout the manuscript. The accession numbers remain unchanged.

NCBI taxonomists:

The use of the genus name 'Pleuronema' for cyanobacteria is illegitimate as it is already in use for a genus of Ciliophora (Pleuronema Dujardin, 1841). You should modify the associated names in your submission (and in your manuscript) accordingly.
