

Figure S1

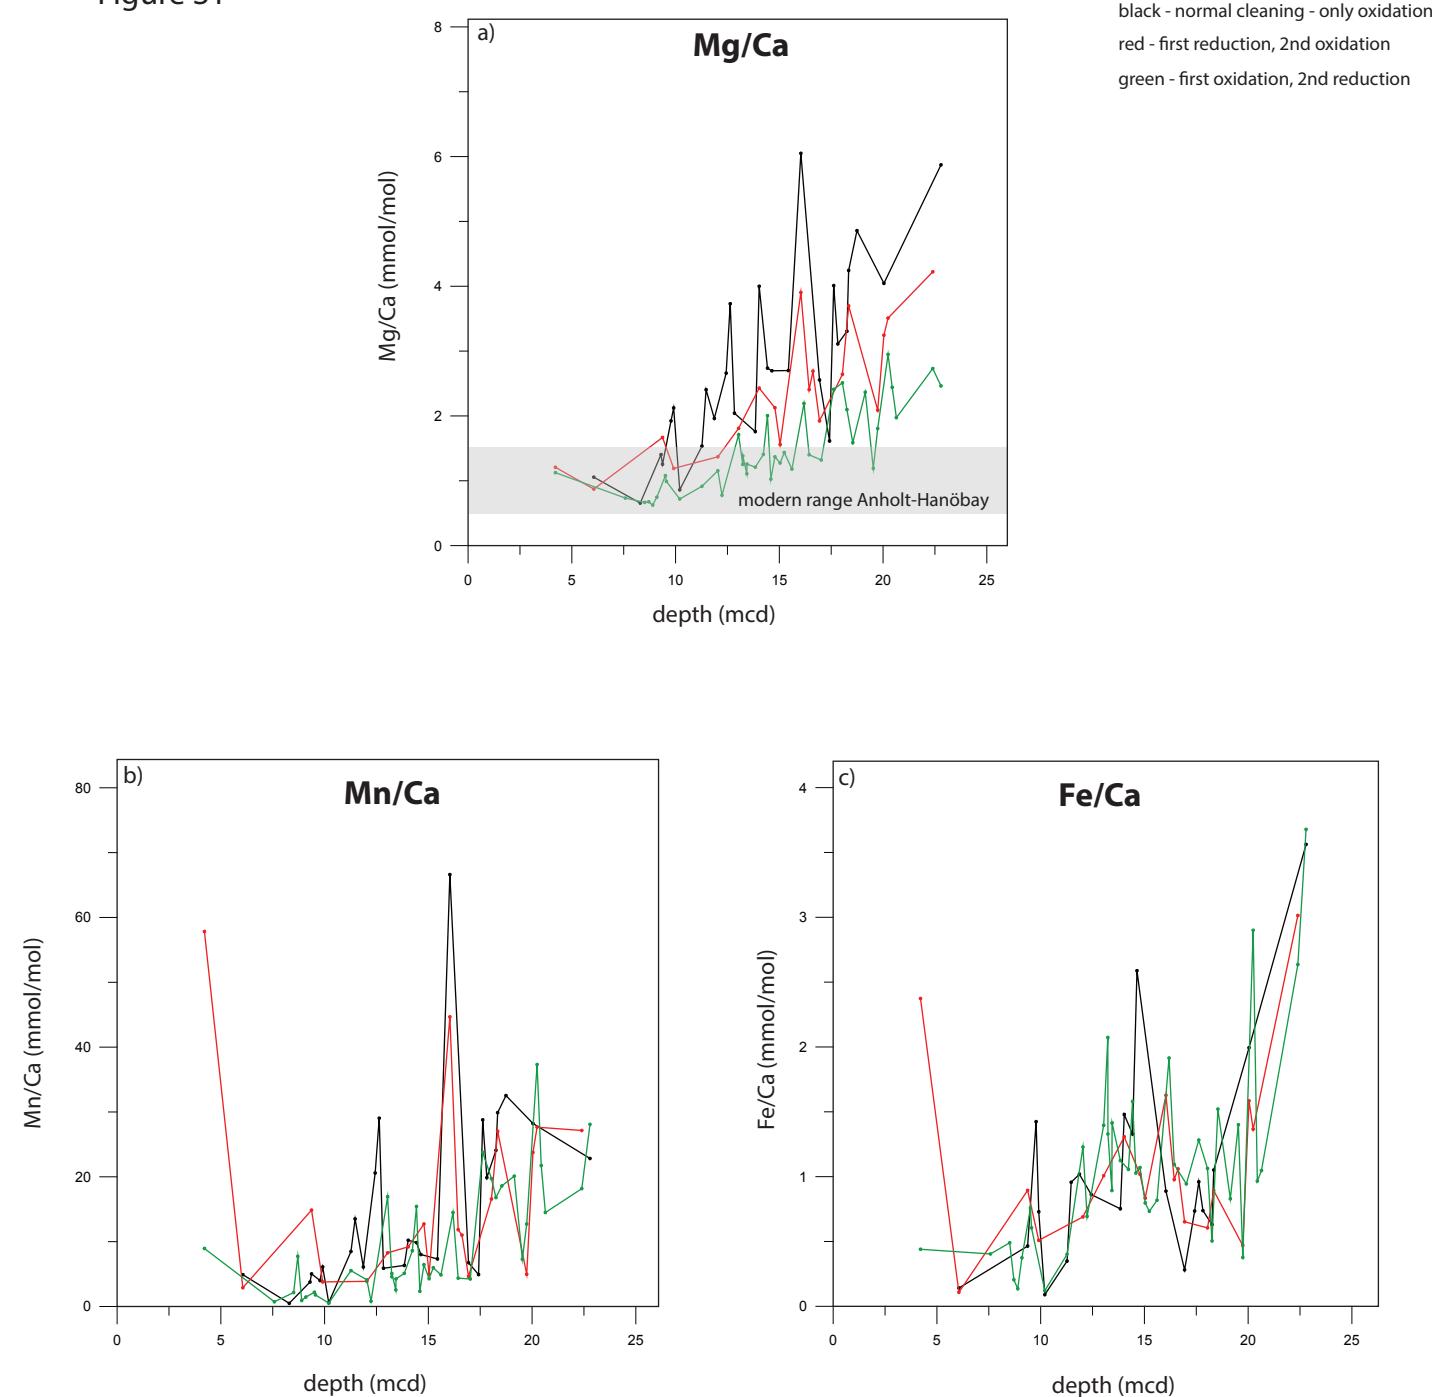

Fig. S1: Downcore trace metal/calcium results for Mg/Ca (a), Mn/Ca (b), and Fe/Ca (c) vs depth (mcd) for Site M0059. Black curve represents regular cleaning of the foraminiferal tests with oxidation (Barker et al., 2003), the red curve represents reduction cleaning followed by oxidation (Martin and Lea, 2002), and the green curve first oxidation followed by reduction cleaning (this study). Grey bars in a) indicate the range of values analysed for core top foraminifera from the Baltic Sea, Skagerak, and Gullmar Fjord (Groeneveld and Filipsson, 2013).
