Moutin et al. present this overview paper on OUTPACE cruise. It is a well written manuscript and the objectives of the cruise are discussed clearly. But I feel there is a need to list the major findings of this cruise. Results can be discussed in individual manuscripts of the special issue separately, but major and important findings reported in each manuscript can just be listed (with references) here. I have some minor suggestions as follows:

Page 2: line 32, oligotrophic itself means low concentration so the ‘oligotrophic’ word is redundant here.

Page 3: line 9, This 60% is only the surface area (not the volume), so ‘ocean’ could be replaced by ‘surface ocean’ to make explicitly clear.

Page 4: lines 3-5: “A δ¹⁵N budget……………..export production”. Please check the recent work done in the Arabian Sea by (Gandhi et al. 2011; Kumar et al. 2017), who showed that the contribution of N₂ fixation to export production can be up to 92%.

Page 4: line 9, ‘significant contribution’, provide the quantitative estimate. I am not sure though if nanoSIMS could provide that. Since the authors mentioned ‘significant’, it becomes important to know the quantitative amount.

Page 4: line 15, ‘this question’, which question?

Page 4: line 16-21, “While average……………. New Caledonia”. Again see (Gandhi et al. 2011; Kumar et al. 2017), who observed the highest ever rates anywhere in the world ocean. Particularly check the table (2) in (Kumar et al. 2017) that has listed all and compared all the rates – updated after (Benavides and Voss 2015).

Page 5: line 18, satisfactory does not sound proper here. It is subjective – it could be satisfactory to one person but not to others.

Page 6: lines 5-6, revise the sentence for grammar

Page 7: line 16, Marine Video Profiler does not acronym to UVP. Do the authors mean Underwater Vision Profiler?

Table 1: (deg, min) data are just converted to degrees in the next columns, which is redundant.

Fig. 1: N₂ fixation is discussed several times in the manuscript. It would be helpful to represent this process in this schematic diagram.
