I would like to personally thank this anonymous reviewer for their detailed comments on our discussion paper. This reviewer has clearly articulated a set of key points that we will need to address to move forward, and has taken the extra (and much appreciated) step of providing specific suggestions on how we may address these concerns. Again, I thank this reviewer for taking the time to read and fully consider our discussion paper, and hope they will be willing to again assess our work after our next set of revisions.

Thanks Bryce
